## PREFACE

The Council of Canadian Fire Marshals and Fire Commissioners (CCFM/FC) is a national organization through which issues relating to fire prevention can be discussed constructively in an atmosphere of mutual respect, cooperation and understanding. Its primary objective is to advise on and promote legislation, policies, and procedures pertinent to fire protection; participate in the development of codes and standards relating to fire safety; promote fire safety awareness; support the professional development of the Canadian fire service; identify trends relative to the causes and the severity of fire; provide advice to Accredited Agencies involved in the certification and testing of fire protection equipment and materials relating to fire safety and provide a forum for the exchange of information on fire safety matters.

The 2001 Annual Report of Fire Losses in Canada is the 80th edition to be published. It is prepared by Fire Protection Services, Human Resources and Skills Development Canada, pursuant to federal government fire protection policy, and it is compiled from information supplied by the Council of Canadian Fire Marshals and Fire Commissioners (CCFM & FC), Indian and Northern Affairs Canada (INAC) and Statistics Canada.

Sincerely,

Eugene Marotta  
Director  
Fire Protection Services  
Human Resources and Skills Development Canada

November, 2004

## SUMMARY

In 2001, a total of 55 323 fires were reported; 338 fire deaths; 2 310 fire injuries; and a total of \$1 420 779 985 in property losses.

The "Residential Property" classification continues to account for the largest number of fires. In 2001, there were 21 494 fires in this category, 39% of the Canadian total. These incidents resulted in 273 deaths or approximately 73% of the nation's fire fatalities. The monetary loss amounted to \$632 million, which is 45% of the total loss.

The property classification showing the second largest number of fires is "Special property and transportation equipment," where 20 457 fires were reported, accounting for approximately 37% of the overall Canadian total. Under ground transport vehicle, 11 343 incidents were reported, amounting to a dollar loss of \$84 million. The total dollar loss for the "Special properties and transportation equipment" classification is \$162 million.

In Table 5 "Source of Ignition" the following three groups (not including miscellaneous) lead the list of number of reported fires and property dollar loss: "Smoker's Material and Open Flame" with 10 996 and a dollar loss of \$220 283 821, "Cooking Equipment" with 5 625 incidents and a loss of \$87 million, and "Heating Equipment" with 4 893 incidents and a loss of \$89 million.

Table 7 provides a review of the fire data identified under the heading of "Act or Omission." As in the past, the category of "Mechanical, Electrical Failure and Malfunction" had the greatest number of recorded fires, that being 11 330 and a dollar loss of \$288 million. "Incendiary or other set fires" accounted for 10 876 incidents with a dollar loss of \$251 million.

In summary, "Residential Properties" remains an area of utmost concern. The large number of electrical incidents and the associated dollar loss, as well as the number of "Incendiary fires" and the associated dollar loss, are two other areas of major concern within the Fire Services. A continued effort by all fire protection authorities as well as the public is most imperative in order to reduce the loss of lives, number of fires and property damage.
